- Post mitigation duel testing kits w/ 3rd party lab results-	\$95.00	\$95.00

* This estimate is valid for two weeks from the date on the top of this invoice. We guarantee the invoice will not exceed the total estimate.

* Full payment must be supplied at completion of the first day on the residence.

* Our systems are high quality and built to last, some of our features include: 5" core drilled slab port hole, larger 4" piping, stainless steel & galvanized fasteners and anti-vibration technology for minimal noise. All parts and labor is warranted for 5 years which is transferrable to all owners of the home.

* Foundation sealing insists of sealing all penetrations which radon gas can enter. The areas will be properly sealed with backer rod and high quality flexible polyurethane sealants. This price per sq ft also includes any crawlspace where a membrane is required.

* Sump pumps should be replaced if older than 5 years before a cover is installed. The specific cover designed for radon applications allows access to the pit but seals the penetration from gases entering the home.
